

## AFG SLR

### ADJUSTABLE MOUNTING TABS

1. Tabs that make installation quick, easy, and flexible.

### HAND GUARD

2. Guard that protects from potential injury or fan obstruction.

### BUILT-IN PRESET THERMOSTAT

3. A mechanical thermostat that determines when your fan turns on and off (72 °F off 83 °F on).

### COMPUTER BALANCED FAN BLADES

4. Industry-leading Brushless DC Motor that allows for a long lifespan with no maintenance.

### ULTRA-ENERGY EFFICIENT DC MOTOR

5. Brushless DC Motor that allows your attic to run whenever you need it to

### AC/DC INVERTER

6. Allows your Solar Attic Fan to run on your electrical grid so your fan can operate 24/7 even after the sun

### SOLAR PANEL PLUG-IN CORD

7. 30-foot cord that allows you to place the solar panel in the optimal location.

### INVERTER PLUG-IN CORD

8. 20-foot cord that allows you to plug and play from anywhere in the attic.

### SOLAR PANEL

10. Eco-friendly solar panels that absorb enough energy to power your solar attic fan

### TILT ADJUSTMENT BRACKET

11. Brackets that allow you to tilt your solar panel in the most ideal angle, up to 60°
